

96x96

**SPECIFICATIONS****DISPLAY**

Liquid crystal display with backlight  
 4 lines, 4 digits per line to show electrical Parameters  
 5th line, 8 digits to show energy

Bar graph for current indication as percentage of  
 CT rating

**LCD INDICATIONS**

- Integration of energy
- Unit is in configuration menu
- Communication in progress
- Maximum & Minimum Demand of Power

**WIRING INPUT**

3 Ø - 4 wire, 1 Ø - 2 wire, 3 Ø - 3 wire

**RATED INPUT VOLTAGE**

100 to 240V AC (L-N) ; 173 to 415V AC (L-L)

**FREQUENCY RANGE**

45-65 Hz

**CT PRIMARY**

5A to 6,000A (Programmable for any Value)

**CT SECONDARY**

5A

**PT PRIMARY**

100V to 600V (Programmable for any value)

**PT SECONDARY**

173 to 415V AC (L-L)(Programmable for any value)

**DISPLAY UPDATE TIME**

1 sec for all parameters

**DISPLAY SCROLLING**

Automatic / Manual

**AUXILIARY**

85 to 270V AC, 50/60Hz

**TEMPERATURE**

Operating : 10 to 55°C  
 Storage : -20 to 75°C

**HUMIDITY**

85% non-condensing

**MOUNTING**

Panel mounting

**WEIGHT**

230gms

**OUTPUT**

Pulse Output : Voltage range: External 24VDC max.  
 Current capacity : 100 mA max

Pulse Duration : Selectable between 50, 100, 150,  
 200, 250, 300 ms.

Pulse Width : Selectable between 0.1 to 9.99kWh

# TO COMPLY WITH MID CERTIFICATION THE CT RATIO MUST BE SET BEFORE PUTTING THE METER INTO SERVICE

ACCURACY		
Measurement	Accuracy	
Voltage V <sub>LN</sub>	±0.5% of Full scale	
Voltage V <sub>LL</sub>	±0.5% of Full scale	
Current	±0.5% of Full scale	
Frequency	±0.1%	For L-N Voltage >20V , For L-L Voltage >35V
Active Power	1%	
Apparent power	1%	
Reactive Power	1%	
Power factor	±0.01	
Active energy	EN50470-1/3 : Cl.B	
Reactive energy	EN62053-23 : Cl.2	
Apparent energy	1%	
MAX / MIN Active Power	1%	
MAX / MIN Reactive Power	1%	
MAX Apparent Power	1%	
PT Ratio x CT Ratio	kWh	J
<15	0.01K	0.01K
<150	0.1K	0.1K
<1500	1K	1K
<4161	0.01M	0.01M

**NOTE :**

- 1) For Voltage, Current, Power, resolution is automatically adjusted.
- 2) For power factor, resolution is 0.01
- 3) For RI-F-100-C : Total energy is highest resolution of loads.

**Configuration Lock Parameters**

When the configuration mode is entered and any of the parameters are changed the user has only 15 minutes to make changes. After this time the parameters below are locked and cannot be changed.

The meter can only be unlocked by returning it to the factory for the lock out.

**PARAMETERS ARE :**

- |  |                      |                      |
|--|----------------------|----------------------|
|  | Network Selection    | CT Primary/Secondary |
|  | PT Primary/Secondary | Factory Default      |
|  | Energy Reset         | Pulse width/Duration |

**WIRING GUIDELINES****WARNING :**

1. To prevent the risk of electric shock, power supply to the equipment must be isolated during installation.
2. Wiring shall be done strictly according to the terminal layout. Confirm that all connections are correct.
3. To reduce electromagnetic interference use of wires with adequate ratings and twists of the same in equal size shall be made with shortest connections.
4. Routing of connecting cables shall be away from any internal EMI source.
5. Cable used for connection to power source, must have a cross section of 0.5mm<sup>2</sup> to 2.5mm<sup>2</sup>.  
(20 to 14AWG ; 75°C (min) )
6. Copper cable should be used.
7. Before attempting work on device, ensure absence of voltages using appropriate voltage detection device.
8. All wiring to be accordance with applicable local standards.

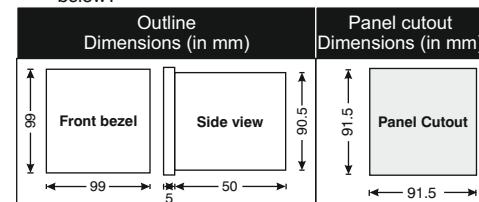

**INSTALLATION GUIDELINES****CAUTION :**

1. This equipment, being built-in-type, normally becomes a part of main control panel and in such case the terminals do not remain accessible to the end user after installation and internal wiring.
2. Conductors must not come in contact with the internal circuitry of the equipment or else it may lead to a safety hazard that may in turn endanger life or cause electrical shock to the operator.
3. Circuit breaker or mains switch must be installed between power source and supply terminals to facilitate power 'ON' or 'OFF' function. However this switch or breaker must be installed in a convenient position normally accessible to the operator.
4. The equipment shall not be installed in environmental conditions other than those mentioned in this manual.
5. The equipment does not have a built-in-type fuse. Installation of an external fuse of suitable rating for the electric circuit is highly recommended.

**MECHANICAL INSTALLATION**

For installing the meter

1. Prepare the panel cutout with dimensions as shown below:

2. Push the meter into the panel cutout. Secure the meter in place by fitting the clamps from the rear side. Fit clamps on both sides, diagonally opposite for optimum fitting.

3. For proper sealing, tighten the screws evenly with required torque.

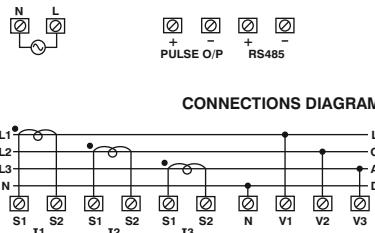

4. Recommended conductor cross section = 1.5mm<sup>2</sup>  
 Screw clamp tightening torque = 0.1N-m

**CAUTION**

When installed the equipment must not come in close proximity to any heating sources, oil, caustic vapors, steam or other unwanted process by-products.

**EMC Guidelines :**

1. Input power cables should be kept as short as possible.
2. Layout of connecting cables shall be away from any

**TERMINAL CONNECTIONS****SERIAL COMMUNICATION**

Interface standard and protocol	RS485 MODBUS RTU
Communication address	1 to 255
Transmission mode	Half duplex
Data types	Float, Hex and Integer
Transmission distance	500 Metre maximum
Transmission speed	300, 600, 1200, 2400, 4800, 9600, 19200 (in bps)
Parity	None, Odd, Even
Stop bits	1 or 2
Response time	100 ms (max and independent of baud rate)

## FRONT PANEL DESCRIPTION

### ONLINE PAGE DESCRIPTION

There are 6 dedicated keys labelled as V, I, VAF, PF, P, E. Use these 6 keys to read meter parameters. Simply press these keys to read the parameters.

KEY PRESS	ONLINE PAGE DESCRIPTION
Press "V"	<p><b>The first screen :</b> Displays line to neutral Voltage of three phase and average line to neutral voltage.</p> <p><b>The second screen :</b> Displays line to line voltage of three phase and average line to line voltage.</p> <p><b>The third screen :</b> Displays total percentage harmonics of line to neutral voltage of three phase and average line to neutral voltage.</p> <p><b>The fourth screen :</b> Displays total percentage harmonics of line to line voltage of three phase and average line to line voltage.</p> <p><b>The fifth screen :</b> Press for 3 sec, Displays phase sequence indication.</p> <p><b>Note :</b> 1) For 3 Ø 3 wire system, for only the second and forth screen will be available. 2) In 1 Ø 2 wire system only first, third and fifth screen will be available.</p>
Press "I"	<p><b>The first screen :</b> Displays phase current of three phase and neutral current.</p> <p><b>The second screen :</b> Displays phase maximum current demand of three phase and average current.</p> <p><b>The third screen :</b> Displays total percentage harmonic of current of three phase and average phase current.</p> <p><b>The fourth screen :</b> Press for 3 sec, Displays current connection indication page.</p> <p><b>Note :</b> For 3 Ø 3 wire system only first, second and third screen will be available. Displays average current instead of neutral current.</p>
Press "VAF"	<p><b>The first screen :</b> Displays voltage, current, power factor of first phase and frequency.</p> <p><b>The second screen :</b> Displays voltage, current, power factor of second phase and frequency.</p> <p><b>The third screen :</b> Displays voltage, current, power factor of third phase and frequency.</p> <p><b>The fourth screen :</b> Displays average value of voltage, current and power factor of three phase and frequency.</p> <p><b>Note :</b> 1) In 3 Ø 3 wire system voltage current power factor and freq. will be line to line. 2) In 1 Ø 2 wire system only first screen will be</p>
Press "PF"	<p><b>The first screen :</b> Displays power factor of three phase and average power factor.</p> <p><b>Note :</b> For 3 Ø 3 wire system, only average power factor will be available on this screen.</p>

## KEY PRESS

## ONLINE PAGE DESCRIPTION

Press "P"	<p><b>The first screen :</b> Displays active power of three phase and total active power.</p> <p><b>The second screen :</b> Displays reactive power of three phase and total reactive power.</p> <p><b>The third screen :</b> Displays apparent power of Three phase and total apparent power.</p> <p><b>The fourth screen :</b> Displays active, reactive, apparent power and power factor of first phase.</p> <p><b>The fifth screen :</b> Displays active, reactive, apparent power and power factor of second phase.</p> <p><b>The sixth screen :</b> Displays active, reactive, apparent power and power factor of third phase.</p> <p><b>The seventh screen :</b> Displays total active, reactive, apparent power and average power factor of three phase.</p> <p><b>The eighth screen :</b> Displays maximum active power demand, reactive power demand and apparent power demand.</p> <p><b>The ninth screen :</b> Displays minimum active power demand and reactive power demand.</p> <p><b>Note :</b> 1) For 3 Ø 3 wire system only seventh, eighth and ninth screen will be available. 2) In 1 Ø 2 wire system only first, second, third,</p>
Press "E"	<p><b>The first Screen :</b> Displays import active energy of first phase.</p> <p><b>The second screen :</b> Displays import active energy of second phase.</p> <p><b>The third screen :</b> Displays import active energy of third phase.</p> <p><b>The fourth screen :</b> Displays export active energy of first phase.</p> <p><b>The fifth screen :</b> Displays export active energy of second phase.</p> <p><b>The sixth screen :</b> Displays export active energy of third phase.</p> <p><b>The seventh screen :</b> Displays total import active energy of three phase.</p> <p><b>The eighth screen :</b> Displays total export active energy of three phase.</p> <p><b>The ninth screen :</b> Displays total net active energy of three phase.</p> <p><b>The tenth Screen :</b> Displays import reactive energy of first phase.</p> <p><b>The eleventh screen :</b> Displays import reactive energy of second phase.</p> <p><b>The twelfth screen :</b> Displays import reactive energy of third phase.</p> <p><b>The thirteen screen :</b> Displays export reactive energy of first phase.</p> <p><b>The fourteen screen :</b> Displays export reactive energy of second phase.</p> <p><b>The fifteen screen :</b> Displays export reactive energy of third phase.</p> <p><b>The sixteen screen :</b> Displays total import reactive energy of three phase.</p> <p><b>The seventeen screen :</b> Displays total export reactive energy of three phase.</p> <p><b>The eighteen screen :</b> Displays total net reactive energy of three phase.</p> <p><b>The nineteen screen :</b> Displays apparent energy of first phase.</p> <p><b>The twenty screen :</b> Displays apparent energy of second phase.</p> <p><b>The twenty first screen :</b> Displays apparent energy of third phase.</p> <p><b>The twenty second screen :</b> Displays total net apparent energy of three phase.</p> <p><b>NOTE :</b> 1) For 1 phase 2 wire network, all page will be same as 3 phase 4 wire. 2) For 3 phase 3 wire network only total import, total export and total net energy will display.</p>

## Safety Precautions

Safety related codifications, symbols and instructions that appear in this operating manual or on the equipment must be strictly followed to ensure the safety of the operating personnel as well as the instrument.

If the equipment is not used in a manner specified by the manufacturer it might impair the protection provided by the equipment.

Do not use the equipment if there is any mechanical damage.  
Ensure that the equipment is supplied with correct voltage.

### CAUTION :

1. Read complete instructions prior to installation and operation of the unit.
2. Risk of electric shock.
3. The equipment in its installed state must not come in close proximity to any heating sources, oils, steam,Caustic vapors or other unwanted process by products.

## CONFIGURATION

There are 6 dedicated keys with symbols marked as use these 6 keys to enter into configuration menu / change setting.

**NOTE :** The settings should be done by a professional, after going through this users manual and after having understood the application situation.

For the configuration setting mode :

- Use + keys for 3 sec to enter or exit from the configuration menu.
- Use or keys to move cursor left or right by one digit each time.
- Use or keys for increasing or decreasing parameters value.
- Use key to go back to previous page.
- Use key to save the setting and move on to next Page.

Config. page.	Function	Range or Selection	Factory Setting
	Password	0000 to 9998	1000
1	Change Password	No / Yes	No
1.1	New Password	0000 to 9998	1000
2	Network Selection	3P4W, 3P3W 1P2W-P1	3P4W
3	CT Secondary	Preset	5
4	CT Primary	5A to 6,000A	160
5	PT Secondary	173V to 415V	350
6	PT primary	100V to 600V	350
7	Slave Id	1 to 255	1
8	Baud Rate	300, 600, 1200, 2400, 4800, 9600 and 19200	9600
9	Parity	None, Even, Odd	None
10	Stop Bit	1 or 2	1
11	Back Light	0 to 7200 sec.	0000
12	Demand interval method	Sliding / Fixed	Sliding
13	Demand interval duration	1 to 30	15
14	Demand interval length	1 to 30 min	1
15	Max Page Auto	1 to 21	21

## PRODUCT DESCRIPTION

Press PF key for 10 sec display CRC in first two row, version in 3rd or 4th raw & serial no in last row.
AUTOMATIC / MANUAL MODE DESCRIPTION
Press E ( button for 3 seconds to toggle between Automatic and Manual mode.
<b>Note :</b> By default unit operates in automatic mode.
In automatic mode online pages scroll automatically at the rate of 5 seconds per page.
In automatic mode when any key is pressed, unit temporarily switches to manual mode and the appropriate page is displayed, also if no key is pressed for 5 sec, unit resumes automatic mode.

## MODBUS REGISTER ADDRESSES LIST

Readable / writable parameters : [Data Structure : Integer]

Formula to find address of individual Harmonic

{143 + [(Harmonic no-2) x 2] + 60 x Constant Parameter}

Constant Parameter	Meaning
0	Voltage V1N
1	Voltage V2N
2	Voltage V3N
3	Voltage V12
4	Voltage V23
5	Voltage V31
6	Current I1
7	Current I2
8	Current I3

For Example,

To find the 14<sup>th</sup> Harmonic address of Voltage V31  
following formula can be used :

Formula with the parameter :

{143 + [(Harmonic no-2) x 2] + 60 x C P}

Eg. {143 + [(14-2) x 2] + 60 x 5} = 467

So, Check the 14<sup>th</sup> Harmonic of Voltage V31 at 467 address.

Address	Hex Address	Parameter	Range		Length (Register)

Note -

Voltage and current will display in mV and mA .  
Power will display in W (Active), VAr (Reactive) & VA (Apparent). Energy will display in Wh (Active) and VArh (Reactive ).

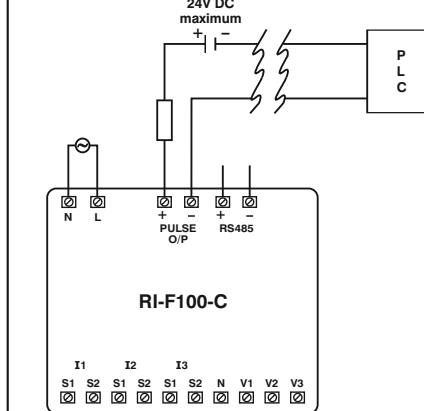

**Energy rollover counter addresses :** This counter will increment when energy is rollover from 9999999 to 0.

## APPLICATION OF PULSE OUTPUT

### ● PROCESS INTEGRATION

Pulse output from RI-F100-C meter can be interfaced into a process through a PLC for on line control of energy content in the process.  
If the PLC has a self excited digital input, external DC supply is not needed.  
The kWh pulse is also used to derive average kWh information at the PLC.

### DECLARATION OF CONFORMITY

According to Directive 2014/35/EU

EC Type Examination Certificate Number: TCM 221/16-5392  
MID Annex B

Issued by: Czech Metrology Institute  
Report Number 6011-PT-TS005-16

Product : Three Phase Energy Meter  
Model No. : RI-F100 Series  
Rating : 0.05-5(6)A

The test sample has been tested in accordance with the requirements of:

Standards:  
EN 50470-1  
EN 50470-3

The technical documentation required to demonstrate that the products meet the requirements of the above EU directives have been compiled and are available for inspection by relevant enforcement authorities.  
The fulfillment of the essential requirements set out in Annex I and in the relevant Instrument-specific Annexes has been demonstrated.  
This declaration of conformity is issued under the sole responsibility of the manufacturer.  
The object of the declaration described above is in conformity with the relevant Union harmonization legislation.

Approved by/Date:

(Specifications subject to change as development is a continuous process.)
